Casper, WY 82602

Distance Nearest Occupied Building:

Type of Incident: Tank Overflow

Description of Released Contaminant: fresh water tainted with crude oil

Volume Spilled: 10.00 barrels **Ag Related:** No

EPA Extremely Hazardous Substance: Unknown **Reported to NRC:** No

Cause of Incident:

While pushing fresh water out of a pipeline and into a temporary storage tank, the tank was inadvertently overfilled. A mixture of fresh water tainted with crude oil flowed onto the ground.

Risk Evaluation:

The overfill poses no immediate risks.

of Fatalities: 0 **# of Injuries:** 0 **Affected Medium:** 03 - soil

Potential Environmental Impacts:

As the spilled material was mainly fresh water, the potential environmental impacts are very limited.

Action Taken or Planned:

A backhoe will be used to excavate and stockpile impacted soils. A vacuum truck is in route to provide for additional storage capacity.

Wastes Disposal Location: To be determined. It will likely be the Indian Hills Disposal facility.

Agencies Involved: U.S.F.S.
